

Felype Kierski Ferreira

Front-End | Innovation | Finance

Profile

With over 7 years of experience in project reporting, data control, and dashboard creation for analytical decision making. I have a proven track record of conducting report plans and analysing processes to optimize efficiency. My expertise includes analysis for financial projects, as well as proficiency in Excel, including the development of systems and databases using VBA, Excel, and logical thinking. Additionally, I possess knowledge in web development technologies such as HTML, JavaScript, CSS (Bootstrap, SASS), and Power BI.

Employment History

Process Analyst at Archi-QS, Australia - Sydney

April 2022 — Present

- Skilled in creating tax depreciation reports, replacement cost reports for insurance purposes, detailed cost estimating reports, and capital works plans.
- Successfully developed and implemented a new system for efficient work order management, internal indicators, and a dashboard for decision making and analysis of lead time for over 30 projects.
- Managing and implementing new systems to improve project templates and efficiency using data analytics such as SQL, WordPress, and Excel. Coding using VBA, HTML and CSS to optimize processes and identify new opportunities.

Business Analyst Sr - Analyst at Schulze Lawyers, Joinville, Brazil

December 2020 — February 2022

- Monitoring financial statements, internal performance activity reports, analysing indicators, and consolidating cash flow. Successfully implemented financial models and dashboards for decision making, and conducted financial assessments of commercial initiatives.
- Estimating monthly budgets reports, creating a historical database of internal expenses and costs to reduce internal costs.
- Monitoring KPI performance for the organization, preparing monthly documents, presentations for executives and board members using data, and collaborating with managers to develop monthly expenses. Proven ability in enhancing finance systems functionality and processes to improve efficiencies.

Business Analyst at Martinelli Lawyers, Joinville, Brazil

June 2016 — April 2020

- Responsible to implement financial solutions for a diverse range of industries including small, medium, and large companies through direct analytical involvement. Proven experience in monitoring and conducting RD&I plans for products, services or processes of projects valued over \$10 million.
- Developed and implemented a database for financial modeling to improve service cycle time, budgeting, and forecast planning, as well as creating business models.
- Led the effort in business process management including cost management, financial reporting, income statement operating, and analysis of solutions to be implemented.

Achievements

1. Developed and implemented an internal flow system, resulting in improved efficiency and productivity.
2. Created a dashboard featuring key performance indicators with monthly/yearly comparisons to support decision-making.
3. Improved internal templates by automating processes and streamlining them, resulting in a 75% reduction in execution time.
4. Achieved a 70% increase in profits for one product as a result of implementing the internal flow system and improved templates.
5. Led the team to organise internal products by dividing them into 5 groups to enhance analysis and distribution of work.
6. Created a comprehensive database from scratch, including employee information and performance indicators.
7. Contributed to a project called "Smart Project" by securing funding for Startups.
8. Reduced turnover by 50% through an in-depth analysis of exit interview data and implementation of corresponding improvements.
9. Led a team to deliver a high-priority project within 6 months, resulting in a 20% reduction in process times.
